The U.S. President's Malaria Initiative (PMI) delivers cost-effective, life-saving malaria interventions alongside catalytic technical and operational assistance to equip and empower partner countries to end malaria. PMI benefits more than **700 million** people each year.

PMI works where malaria hits hardest, supporting 24 partner countries in sub-Saharan Africa and three programs in the Greater Mekong Subregion in Southeast Asia. PMI partner countries account for almost 90 percent of all malaria cases and deaths worldwide.

Malaria is one of the world's oldest and deadliest diseases. In 1900, nearly every country in the world had malaria—including the United States. Malaria was eliminated in the United States in the 1950s.

PMI helps protect those most at risk, especially pregnant women and young children. Around three-quarters of all malaria deaths are in children under age five.

**MALARIA CAUSED
247 million cases
AND 619,000 deaths
WORLDWIDE IN 2021**

FY 2022 PMI BUDGET

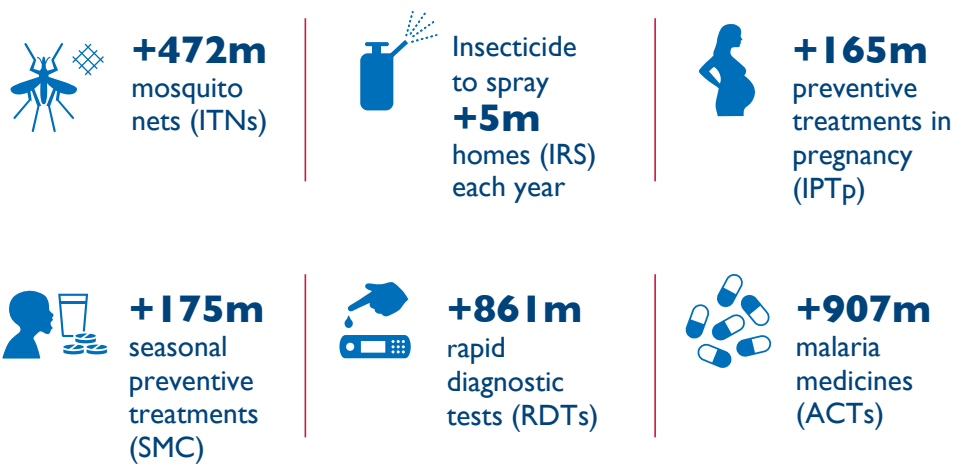

\$746m

Preventing and controlling malaria is a U.S. national security and foreign-assistance priority—and one of the most cost-effective development investments. Thanks to the bipartisan support of Congress and the generosity of the American people, PMI investments bolster the capacity of partner countries to lead malaria control efforts and foster stronger alliances with the United States.

KEY INTERVENTIONS

PMI provides vital funding for proven interventions such as mosquito nets, insecticides, rapid tests, and medicines. PMI also strengthens health systems to fight malaria, other infectious diseases, and future pandemics through training health workers, improving supply chains, advancing data monitoring, promoting healthy behaviors, and more.

DELIVERED SINCE LAUNCH:

PMI helps partner countries stay ahead of emerging threats such as insecticide and drug resistance. For example, PMI funds new tools such as next-generation nets and trains local scientists to detect early signs of resistance. PMI programs are also resilient and have continued to protect millions from malaria during the COVID-19 pandemic.

PMI FUNDS MORE THAN **240** mosquito surveillance sites.

PMI FUNDS MORE THAN **60** drug resistance monitoring sites.

PROGRESS

Since 2000, alongside partner countries and the global malaria community, PMI has helped:

Since 2006, in countries where PMI works, global efforts have supported:
