ZIMBABWE

PMI has supported Zimbabwe to fight malaria since **2011**

12.9 million, 79% of Zimbabwe's population, is at risk for malaria

Malaria is a major burden in the country, with **365,600 cases** and **900 deaths** in 2022*

Peak malaria transmission follows rainy season from **November to April**

PMI'S PROGRAM IN ZIMBABWE

The U.S. President's Malaria Initiative (PMI) provides vital financial and technical assistance that enables the Government of Zimbabwe to deploy lifesaving interventions proven to fight malaria.

PMI is a critical funding source for insecticide-treated nets, malaria diagnosis and treatment, and more. PMI investments also support stronger, more-resilient health systems. For example, PMI helps train health workers, strengthen supply chains, improve data monitoring, and reinforce health policies.

PMI Zimbabwe's fiscal year 2023 budget was \$15 million. PMI investments support and build on those made by the Government of Zimbabwe, in coordination with other stakeholders. PMI investments are detailed in the Malaria Operational Plan for Zimbabwe,** which was developed in consultation with the National Malaria Control Program, other donors, and technical organizations. Planned PMI activities reflect national and PMI strategies, draw on best-available data, and align with the country context and health system.

PMI'S IMPACT ON ZIMBABWE'S MALARIA FIGHT

Since partnering with PMI, Zimbabwe has made significant progress against malaria. Child death rates have fallen and lifesaving interventions such as mosquito nets and preventive treatment for pregnant women are reaching more people. Health systems are stronger and health workers have received more than 67,200 trainings to help them fight malaria.

SINCE PMI SUPPORT BEGAN*

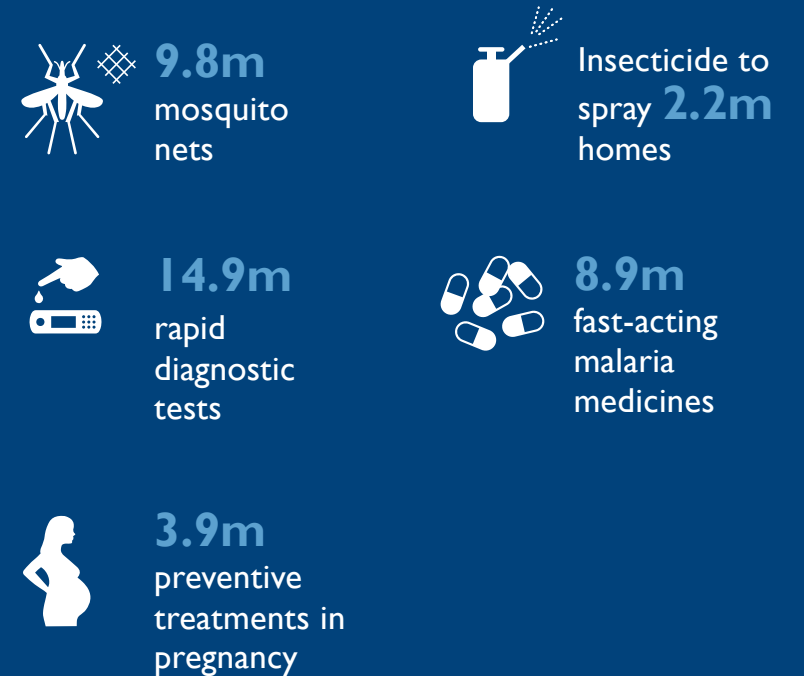

*See the latest PMI Annual Report on pmi.gov for more detail

The U.S. President's Malaria Initiative (PMI) supports 27 partner countries in sub-Saharan Africa and three programs in the Greater Mekong Subregion in Southeast Asia to control and eliminate malaria. Led by the U.S. Agency for International Development (USAID) and implemented together with the U.S. Centers for Disease Control and Prevention (CDC), PMI delivers cost-effective, lifesaving malaria interventions alongside catalytic technical and operational assistance to equip and empower partner countries to end malaria.

TOTAL PMI FUNDING INVESTED
\$191,012,000
